## PROBLEMS ENCOUNTERED AND SOLUTIONS

- ❖ Difficulties in the rainfall observation during weekends and during vacation in the month of April and May.
- ❖ Our LCD monitor does not function well.
- ❖ Last August, our school encountered floods which are brought by Southwest Monsoons.
- ❖ Through the help of our security guards and SHINE adviser we have monitored the amount of rainfall during vacation and our SHINE president is responsible during weekends.
- ❖ We changed the battery of the LCD Monitor while there is no such weather systems affecting our country.

PRFFWC-PAGASA-2

A stylized illustration of a Christmas tree inside a gear-like frame. The tree is composed of various colored sections: a yellow star at the top, a blue section with white snowflakes, a green section with a white outline, and a purple section. Below the tree is a smiling face with a pink complexion and a wide, toothy grin. The entire scene is enclosed within a grey, gear-like border with eight protruding points, each containing a small, colorful square (blue, pink, green, purple, red, orange, yellow, and green). The text "Christmas Tree out of recycled materials" is overlaid in the center in a bold, orange-outlined font.

Christmas Tree  
out of recycled  
materials

BAHAY - PAMAHALAANG - BAYAN

Happy Christmas

A stylized gear with a grey metallic texture and eight colorful rectangular cutouts around its perimeter. The cutouts are colored: blue (top), pink (top-right), green (right), red (bottom-right), orange (bottom), yellow (bottom-left), green (left), and light green (top-left). Inside the gear's central circle is a colorful illustration. At the top is a bright yellow sun with rays against a blue sky. Below the sun are blue waves. In the center, a hand is shown holding a green leafy object. At the bottom, a smiling face with closed eyes and a wide grin is visible. The entire scene is framed by the gear's inner circle.

Worst Problem we  
encountered in the  
month of August.
